PROFESSIONAL SUMMARY

Experienced Full Stack Developer and Technical Lead with over **8 years of software development experience across automotive and banking industries**. Currently contributing to Mercedes-Benz Malaysia as a Full Stack Developer and Cluster Pioneer, with focus on in-car applications, Mercedes-Benz App services, Android development, backend integration, and connected vehicle experiences. Recognized for driving technical discussions, establishing engineering standards, mentoring developers, supporting hiring decisions, and aligning technical delivery with Product Owner and stakeholder expectations.

CORE COMPETENCIES

Leadership	Automotive & Application	Engineering Stack
• Technical leadership • Team mentoring and coaching • PO and stakeholder collaboration • Hiring and technical interviews • Engineering standards and governance	• Mercedes-Benz App • Navigation and Remote Services • Android • In-car application development • Connected vehicle experiences	• Golang, Java, Kotlin • Spring Boot, REST APIs • Docker, Kubernetes, OpenShift • Jenkins, Helm, Git • PostgreSQL, MongoDB, Cassandra, Kafka

PROFESSIONAL EXPERIENCE

Mercedes-Benz Malaysia | Full Stack Developer & Technical Lead

June 2023 - Present | Puchong, Malaysia

Cluster Pioneer

Serve as Cluster Pioneer, driving cross-cluster technical discussions, collaboration and alignment across development streams.

1. Facilitate knowledge sharing, engineering alignment and continuous improvement initiatives to strengthen team capability.
2. Support strategic topics, innovation initiatives and development stream improvements.
3. Actively contribute to hiring through candidate screening, technical interviews and evaluation discussions.

Mercedes-Benz App | Navigation & Remote Services

Develop and maintain Android and backend solutions for Mercedes-Benz App features within the Navigation and Remote Services domains.

1. Lead technical discussions with Product Owners, architects and cross-functional stakeholders to translate business needs into practical technical solutions.
2. Drive end-to-end feature delivery, including solution design, backend integration, implementation, review and release readiness.
3. Establish engineering standards, best practices, coding guidelines and quality expectations to improve maintainability and consistency.
4. Mentor developers, guide technical decisions and initiate improvement discussions to strengthen team delivery and ownership.
5. Deliver connected vehicle experiences that improve customer engagement, vehicle functionality and digital service experience.

Tips In-Car Application

Build Mercedes-Benz in-car application features that help drivers understand vehicle functionalities through interactive modules, descriptions and instructional videos.

1. Support user guidance for vehicle functionalities such as Speed Warning configuration and vehicle settings.
2. Develop solutions using Android, Golang and QT/QML to deliver seamless and intuitive in-car experiences.
3. Lead technical implementation discussions and coordinate delivery with internal and global stakeholders.

OCBC Bank | Full Stack Developer (AVP5 / Manager 6)

November 2021 - May 2023 | Kuala Lumpur, Malaysia

Worked as technical lead and team lead for multiple banking projects, ensuring delivery quality, code quality and solution maintainability.

1. Maintained and led projects including 8AM, Payment DataHub, Multi-Currency Bank Account, Interbank Fund Transfer and Inward Telegraphic Transfer.
2. Engaged business stakeholders to understand project objectives and design software solutions aligned with banking needs.
3. Provided technical consultation, proof of concepts and solution proposals for product and application lifecycle topics.
4. Coached team members and guided delivery towards common engineering and business goals.
5. Technologies: Git, Maven, Java, Spring Boot, Helm, Jenkins, Kubernetes, OpenShift, Docker and PostgreSQL.

Daimler TSS | Software Engineer / Software Developer

August 2018 - November 2021 | Puchong, Malaysia

Developed enterprise applications following Daimler standards and processes, with focus on reusability, efficiency, scalability, reliability and fault tolerance.

1. Supported customer consultation, requirement analysis, solution design, proof-of-concept development and application lifecycle support.
2. Coached junior developers and supported team delivery for common project goals.
3. Developed and maintained Battery Lifecycle Management and Real-Time Monitoring systems for Daimler China.
4. Technologies: Java, Kotlin, Spring Boot, Angular, VueJS, Docker, Kubernetes, Jenkins, Azure Cloud, PostgreSQL, Cassandra and MongoDB.

Octafa Consulting Sdn Bhd | Java Developer

July 2018 - August 2018 | Kuala Lumpur, Malaysia

Maintained and enhanced existing Java-based systems with focus on stability and supportability.

Software International Corporation | Associate Software Engineer

June 2017 - June 2018 | Kuala Lumpur, Malaysia

Provided RESTful services for iOS mobile frontend applications and supported rolled-out systems for Prudential Singapore.

Developed, supported and maintained enterprise applications using Java, Spring RESTful services, SOAP, Oracle SQL, JUnit and related technologies.

iMocha Sdn Bhd | Software Engineering Intern

March 2016 - June 2016 | Kuala Lumpur, Malaysia

Assisted with development environment setup, troubleshooting, design, development, testing and timely status updates.

Contributed suggestions to improve project efficiency and engineering workflow.

EDUCATION

Asia Pacific University of Technology & Innovation (APU) | Bachelor's Degree, Computer Software Engineering

2013 - 2016

Bachelor of Science in Software Engineering with First Class Honours.

CGPA: 3.82

AWARDS & ACHIEVEMENTS

First Class Honours Graduate.

The Prize for **Outstanding Student, BSc (Hons) in Software Engineering 2016/2017.**

Cluster Pioneer and active contributor to technical hiring, mentoring and knowledge-sharing initiatives.
